

HP-flex is an opportunity for all:

- HP sector
- Citizens
- EU-bussinesses: new and exsisting
- Climate goals

THREE STEPS TO UNLOCK HEAT PUMP FLEXIBILITY

FOR SMARTER, MORE EFFICIENT ENERGY CONSUMPTION

Residential

Industrial

Commercial

HEAT PUMP FLEXIBILITY

1

Cyber + data
secure heat pump

2

Interoperability
behind the meter

3

Flexibility to
the grid

STEPS

General principles of **heat pump** flexibility

NCDR

Aims at **voluntary consented flexibility** unlocking for the grid, from the end users.

It lays down the **overall technical frame** for demand response as well as it **delegates** the further technical details to its **implementing acts** and the **national level**.
